PROFESSIONAL SUMMARY

Software developer with five-plus years across government, research, and private-sector teams, shipping full-stack web and mobile systems end to end. Owns projects from scoping through release and handover, and has led delivery teams of three to eleven.

EXPERIENCE

Software Developer and Project Manager

2023 – Present

Information and Communication Technology Division

- Develop and maintain internal web systems for provincial government offices: budget management, supplies distribution, service queuing on web and mobile, and property ledgers.
- Manage project delivery across offices alongside hardware repair and end-user support.
- Own each system end to end: requirements, screen design, build, release, and turnover documentation.

Internships and Practicum

Project Manager and Software Developer, Spring Valley Technology and Innovation

800 hrs

3D Designer and Software Developer, TUP–Visayas Research and Innovation Center

200 hrs

Desk Receptionist and Video Editor, Island Living Channel

150 hrs

FEATURED PROJECTS

Budget System (BMS)

AdonisJS, React, MySQL, MUI

Covers the full annual budget cycle: proposal, appropriation, allotment, obligation, and disbursement, with real-time data and 70+ statutory and management reports for everyone involved in the budget. In use by government offices across Negros Occidental Island.

Ledger

Flutter, Dart, Firebase, Hive

Android finance app built solo in 10 weeks: multiple wallets on one balance, savings goals and debt tracking, offline sync, and an AI assistant grounded in transaction data.

Pasabay

Flutter, Dart, Maps API

Food-delivery app for home kitchens that sell a fixed batch each day. A live serving count caps each order, and delivery runs on a dropped map pin instead of a typed address.

Aspentech Solutions

React, TypeScript, Laravel, MUI

Company website that lets a client preview six of our systems in their own brand colors and pick the modules they need, then sends those choices straight to us as their quote request.

ICTD App

Flutter, React, TypeScript, REST API

Technical requests, asset inventory, and equipment custody in one record set. Field Android app plus a web console for monitoring and reports, with real-time data and push notifications.

Learning Platform (LMS)

React, Node, Express, MySQL

Modular learning platform for any subject: lessons are assigned per student, and submissions are checked automatically against the module's tests or reviewed by hand.

OTHER WORK

Web and mobile: Furniture e-commerce platform with a storefront plus inventory and delivery management

IoT and hardware: DTR face-recognition log-in gate at TUP Visayas, built with a team of six

Design: Interface design in Figma, plus 3D modeling and video editing

Project management: Scoping, scheduling, and stakeholder coordination across offices

EDUCATION

Technological University of the Philippines – Visayas

Bachelor in Engineering Technology, Major in Computer Technology

2019 – 2023

Diploma, ICT Computer Programming

2017 – 2019

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Dart, .NET

Frameworks: React, Node.js, Express, Laravel, AdonisJS, Flutter, WordPress, MUI

Data: MySQL, MongoDB (Atlas), Firebase, Supabase, REST APIs

Tools: Figma, Git, GitHub, Bitbucket, Trello, Android Studio, Linux

CERTIFICATIONS

Civil Service Professional Eligibility, Aug 20, 2023

Safety Officer 2 (SO2), Mar 23, 2023
